DETAILED ACTION

1. Claims 1-19 are pending in the application and are currently under prosecution.

Please Note: In an effort to enhance communication with our customers and reduce processing time, Group 1640 is running a Fax Response Pilot for Written Restriction Requirements. A dedicated Fax machine is in place to receive your responses. The Fax number is 703-308-4315. A Fax cover sheet is attached to this Office Action for your convenience. We encourage your participation in this Pilot program. Thank you in advance for allowing us to enhance our customer service. Please limit the use of this dedicated Fax number to responses to Written Restrictions.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I. Claims 1-6 and 12, drawn to a method for identifying metastatic potential of a prostate cancer cell comprising an immunoassay, classified in class 435, subclass 7.1.

Group II. Claims 1, 7-9, and 12, drawn to a method for identifying metastatic potential of a prostate cancer cell comprising an Northern hybridization assay, classified in class 435, subclass 6.

Group III. Claims 1 and 10-12, drawn to a method for identifying metastatic potential of a prostate cancer cell comprising an RT-PCR assay, classified in class 435, subclass 91.51.

Group IV. Claim 13, drawn to a kit, classified in class 435, subclass 810.

Group V. Claims 14-19, drawn to nucleic acid vectors and recombinant host cells, classified in class 536, subclass 23.1 and class 435, subclass 320.1, respectively.

3. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The inventions are distinct, each from the other because of the following reasons:

Inventions IV-V are disclosed as biologically and chemically distinct, unrelated in structure and/or function, and/or made by and/or used in different methods and therefore the claimed products are distinct.

Inventions I-III, as disclosed, are distinct methods that differ at least in objectives, method steps, reagents and/or doses and/or schedules,

response variables, assays for monitoring the final product and/or response, and/or criteria for success.

The inventions in groups IV-V and I-III are not at all related because the products of groups IV-V are not specifically used in any of the steps of the claimed methods in groups I-III.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen L. Rawlings, Ph.D. whose telephone number is (703) 305-3008. The examiner can normally be reached on Monday-Thursday, alternate Fridays, 8:00AM-5:30PM.
